150th Anniversary of
1930 - The First War of Independence
1931 - 60th Year of Mahatma Shree Swami
1947 - Year of Indian Independence
2017 - Commemoration of 40th anniversary

19th September 2011

Collaborative Research work

It is learnt that the Government College (A) Rajahmundry is one of the Premier Educational Institutions in Andhra Pradesh state, established in the year 1853. Science Courses were started in the year 1930 and that gave birth to the establishment of Department of Physics. The Department of physics carved a place for itself in this college and eminent teachers and scholars brought recognition to the Department.

In 1971, P.G. Course in Physics with Electronics specialization was started. The Department, over the period of time acquired good reputation and this stands next only to the University in student preference to study M.Sc. Physics. The Department also offers M.Phil and Ph.D programs. In the Academic year 2009-10, the Department established Crystal Growth and Nanoscience Research Centre. This is now recognized as a Research Extension Centre of Andhra University. At present three scholars are working for their M.phil/Ph.D degrees.

I am extremely happy to associate with the Physics department of the college for a collaborative research work on luminescent nanomaterials. I am aware that Dr. K. R. Rao, a faculty of this department, is very actively involved in research on different types of solid state materials. He visited our laboratory during the month of January 2011 and has carried out experiments on Eu^{3+} doped SrAl_2O_4 nanomaterials, for the purpose of developing bright luminescent nanomaterials. I assure that, I shall I extent my full support and cooperation in the research activities taken up by the Department of Physics, Government College(Autonomous), Rajahmundry, Andhra Pradesh.

Wishing the college and the department the very best.

(Sudarsan. V)
