20th Sept. 2011

To:
 Dr. K. Ramachandra Rao
 Research Director
 Crystal Growth and Nano-sciences Research Centre
 Government College (A)
 Rajahmundry, Andhra Pradesh 533105

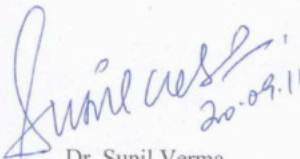

Dear Dr. Ramachandra Rao:

It is my pleasure to accept your request to collaborate with me in the fields of crystal growth and characterization of photonic materials. In fact, our collaboration started in May 2009 when you worked with me in RRCAT, Indore as a Summer Research Fellow of the Indian Academy of Sciences, Bangalore. This was followed by another visit of yours in the year 2011 as SRF. During these visits, excellent work was accomplished by you on the basis of which three journal papers are being prepared. In fact, this has laid a strong foundation for continuing our association in the form of the academic collaboration. I understand that the Physics Department of the Government College (A), Rajahmundry, is one of the premier educational institution in the Andhra Pradesh state, and the association will be mutually beneficial.

I understand that as a result of the research exposure received during the fellowship period and the strong support received from your Principal Prof. G.S. Moses, a "Crystal Growth and Nano-Sciences Research Centre" has been established in the Physics Department and has been recognized as a Research Extension Centre of the Andhra University. It is a very noteworthy addition to your college and I am sure it will go a long way in attracting research scholars of repute to your department.

I will be happy to advise and provide my support, whenever sought, to strengthen the research programme in the areas of crystal growth and photonics in your college.

I wish you the very best.

 20.09.11
 Dr. Sunil Verma
