NAME OF THE DEPARTMENT: STATISTICS

TITLE OF THE BEST PRCATICE: POPULATION DISPLAY

OBJECTIVE (IN ABOUT 100 WORDS)

The objectives of World Population Day 2024 were to:

- Raise awareness about population issues and their impact on society
- Advocate for sustainable practices to address population growth
- Promote gender equality, family planning, and poverty eradication
- Encourage governments to adopt sustainable policies
- Promote youth-friendly measures to prevent unwanted pregnancies
- Ensure every couple has access to reproductive health services
- Invest in young people to create a more equitable and prosperous world

CONTEXT (IN ABOUT 150 WORDS)

- The world's population growth rate is expected to decline in the coming decades, but the population will still be significantly larger in 2050 than it was in 2020.
- The UN says that the world's population growth has accelerated significantly in recent centuries.
- The UN also says that the world's population growth impacts employment, economic development, poverty, and more.
- The UN says that accurate data is needed to address sustainable needs.
- World Population Day is observed on July 11 to highlight global population issues and the need to create awareness about the risks of overpopulation.

THE PRACTICE (IN ABOUT 400 WORDS)

As of July 2024, the world's population was estimated to be around 8.1 billion people. The United Nations (UN) projects that the world's population will continue to grow, reaching a peak of around 10.3 billion in the mid-2080s.

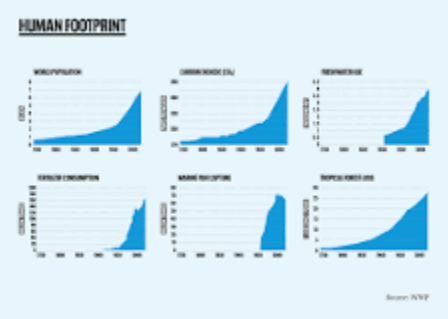
- The UN's World Population Prospects Report provides population trends for countries around the world.
- The UN projects that the world's population will reach 9.7 billion by 2050 and 11.2 billion by 2100.
- The world's population growth rate is expected to decline in the coming decades.
- The rapid growth of the world's population poses many challenges, including climate change, resource depletion, and violence.
- World Population Day is celebrated annually on July 11 to raise awareness about the issues surrounding global population growth.

EVIDENCE OF SUCCESS (IN ABOUT 200 WORDS)

The ***2024 Revision* of *World Population Prospects*** is the twenty-eighth edition of official United Nations population estimates and projections that have been prepared by the Population Division of the Department of Economic and Social Affairs of the United Nations Secretariat. It presents population estimates from 1950 to the present for 237 countries or areas, underpinned by analyses of historical demographic trends. This latest assessment considers the results of 1,910 national population censuses conducted between 1950 and 2023, as well as information from vital registration systems and from 3,189 nationally representative sample surveys. The *2024 revision* also presents population projections to the year 2100 that reflect a range of plausible outcomes at the global, regional and national levels.

PROBLEMS ENCOUNTERED (IN ABOUT 150 WORDS)

What is the problem with the population in the world?



More people inevitably put more demands on the planet. More people require more food, water, sanitation, homes, public services, and amenities – but our Earth is struggling to cope. Populations of wild species have plummeted, global temperatures are rising, our seas are full of plastic and forests are disappearing.

Most populated countries in July 2024

- **India**: 1,409,128,296
- **China**: 1,407,929,929
- **United States**: 340,110,988

NOTES (IN ABOUT 100 WORDS)

As of July 1, 2024, the world's population was 8,161,972,572. The world's population is expected to continue to grow, reaching around 10.4 billion by the end of the century.

Explanation

- The world's population is growing due to improved healthcare, sanitation, and living conditions.
- The global population growth rate is expected to decline in the coming decades.
- The world's population is becoming a threat to human survival and the environment.
- The theme of World Population Day 2024 was "Leave no one behind, count everyone".
