

## Department of Zoology- Best Practice

### Fish seed Released in to River Godavari

Every year on November 21st, the world celebrate World Fisheries Day. It's a day dedicated to highlighting the significance of preserving the world's fisheries and aquatic ecosystems. The day's goal is to promote awareness of the vital role that fisheries play in providing food security and nourishment for millions of people throughout the world, as well as the importance of sustainable fishing practices in conserving marine life and the environment for future generations. Fisheries, both marine and inland, are crucial for people's livelihoods, economy, and overall well-being around the world.

In this view the Department of Zoology collaborate with A.P. Fish Breeding Center, Kadiyam. Both of them celebrate World Fisheries Day at Padalarevu near Dowleswaram, Rajahmundry. The Zoology Dept. students Produced fish larva in their Internship and Project work that larva nearly 20 lacks released into Godavari River. The Dist. Collector Dr. Madhavalatha garu awarded with certificates and appreciate all the students. In this Programme Sri. V.Krishna Rao garu Dist. Fisheries Officer ,D. Gopalarao garu F.D.O., Sri. K.Durgarao, In-charge Zoology Department, Teaching and Non-Teaching Staff, U.G&P.G. Students Participated.

In our College Respected Principal Sir, Dr. Ramachandra RK garu released Fish Seed into Aqua-pond in our College.
