

Hands –on Training on Carp Breeding & Seed Production.

Activity:

Hands-on Training on Carp Breeding & Seed Production organized by FWFF, Balabhadrapuram in collaboration with ICAR-CIFE, Kakinada (22–26 September 2025).

Coordinators: 1. Dr. Shamna.N 2. Mrs. Shobha Rawat.
Technical Assistqant: Mr.Rajiv.

Aims:

- To enhance practical knowledge in carp breeding
- To develop technical skills in seed production
- To bridge the gap between theory and practice

Objectives:

- To train students in broodstock management
- To provide hands-on experience in induced breeding techniques
- To impart knowledge on hatchery operations
- To educate students on nutrition, feeding, and nursery pond management

Procedure:

- Identification and selection of healthy brooders
- Practical sessions on induced breeding
- Training on hatchery management
- Demonstration of feeding practices
- Nursery pond management practices

Outcomes:

- Students gained practical skills in carp breeding
- Improved understanding of aquaculture techniques
- Enhanced hatchery and nursery management skills
- Increased confidence in field applications

Student Feedback:

- Training was highly practical and useful
- Helped in career development in aquaculture
- Interactive and informative sessions
- Suggested more such programmes

Report Summary:

The programme was successfully conducted with active participation. It provided valuable hands-on training and enhanced students' skills in aquaculture practices.
